

LYNNVALE FARM & STUDIO –

THE GAGNON FAMILY

Nestled in the middle of the family farm lie 2 acres of specialty cut flowers that supply local florists and farmers markets across Northern Virginia. View fall production in the field and hoop house and see fall planting for spring production. Create a bouquet from fall flowers. Learn tips for planting spring flowers in the fall. Enjoy local landscape paintings in the milkhouse converted to artist's studio and instruction space. Refreshments and restroom facilities are available.

Horticulture is the science or art of raising and tending to plants.

An **annual plant** lives and blooms for just one year after planting, therefore they are replanted each year. Pansies, petunias and marigolds are examples of annual plants.

A **perennial plant** lives and blooms for several years after planting. Examples of perennial plants are roses, peonies and daffodils.
